

TECHNICAL SPECIFICATIONS

Design Background

The Closer was designed specifically to be simple to install, configure and use. It has an ultra-light footprint and does not run inside of Dynamics GP®, it is installed outside of Dynamics GP®. The Closer does not write, change, update or impact anything in Dynamics GP®. It only selects the required data from Dynamics GP® to be analyzed for reconciliation. The Closer uses its own tables and stored procedures for each Dynamics GP® company. The Closer does not require the user's machine to have access to Dynamics GP®, it only requires an ODBC connection to the Dynamics GP® Database. The Closer works in Citrix and Remote Desktop environments.

Core Technology

- ◆ .NET
- ◆ SQL Stored Procedures

Dynamics GP Supported Versions

- ◆ Microsoft Dynamics GP® v6.0 and up.
- ◆ Support is limited to versions 9.0, 10.0 and 2010.
- ◆ Special considerations are available for v6.0 through v8.0.

Technical Requirements

- ◆ The Closer will run in any operating Dynamics GP® environment.
- ◆ There are no special system requirements to run The Closer.

Update and Enhancement

- ◆ The Closer works with the core tables and fields in Dynamics GP® and is not impacted by each service pack update.
- ◆ The only possible exception to this may be the Inventory Tool, which will be updated for all releases and service packs.
