

# THE VALIDATOR 1099

**THE VALIDATOR1099 is part of the award winning series of tools from Reporting-Central that make MICROSOFT DYNAMICS GP® a BETTER BUSINESS SOLUTION.**

The Validator1099 is the only solution built specifically for Dynamics GP® that automates the process of validating TIN's for expedited and accurate 1099 processing. The Validator1099 compares the relevant GP vendor data against the IRS TIN Match Service. So whether your vendor provided an erroneous TIN, a false name, a bad address or has moved, changed names or started-up under a new TIN – The Validator1099 will catch the issue early and minimize, if not eliminate, your risk in reporting bad information to the government.

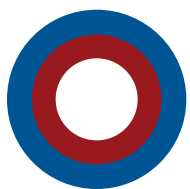

Mark is the originator of the famous "50 tips in 50 minutes", host of [dynamicaccounting.net](http://dynamicaccounting.net) and author of "The Cookbook for Dynamics GP"

## BENEFITS OF THE VALIDATOR 1099

- ◆ Automated TIN Matching
- ◆ Eliminate errors in the 1099 reporting process
- ◆ No more waiting months to know if the TIN's you filed against were accurate
- ◆ No more government fines for incorrect 1099 data
- ◆ No more time spent manually tracking down inaccurate or erroneous details provided by vendors
- ◆ Confidence that you are filing your 1099's accurately

*Data integrity problems with information that is relevant to government compliance will cost you more money than you think, proactively find the errors before the government does.*

## REPORTING CENTRAL

Reporting-Central is focused on making Microsoft Dynamics GP a better business solution. Our award winning solutions, The Closer and The Validator Series help Dynamics GP users save time, money, resources and gain peace of mind by eliminating manual validation and reconciliation processes and reducing overall business risk. From filing 1099's to ultimate data integrity to achieving a "Single Version of The Truth", with the right solutions everyone wins...
